

AMPilatus Platform Whitepaper

1. Executive Summary

AMPilatus GmbH, a VASP (Virtual Asset Service Provider) registered and operating out of Gisikon, Switzerland, is set to revolutionize the financial technology landscape with the launch of its comprehensive crypto application in 2025. This platform will enable global real-time payments, investments in cryptocurrencies, borrowing and lending services, and a merchant system with discounts on major retailers such as Zalando and Nike, along with a cashback program. Designed to function as a Point of Sale (POS) system, the app eliminates the need for traditional payment devices in stores by simply installing the application. An integrated escrow service will ensure secure transactions, described later in simple terms with examples. Additionally, the Swiss Crypto Credit Card will be introduced, enhancing the functionality and integration of cryptocurrencies into everyday financial activities. All AMP Token holders will have voting rights, allowing them to participate in major decisions such as system integrations on the AMP Platform, dividend distributions, and executive elections. This whitepaper will detail the technological, operational, and strategic components of the AMPilatus ecosystem.

2. Problem Statement

2.1 Market Needs

The current financial landscape is characterized by slow and expensive cross-border transactions, limited access to financial services, and a lack of financial inclusion. There is an urgent need for efficient, cost-effective, and inclusive financial solutions.

3. Solution

3.1 AMPilatus App

Our app allows users to make real-time global payments, borrow and lend, and invest in various cryptocurrencies. It serves as a comprehensive financial tool that simplifies and enhances user experience in the financial world.

3.2 Crypto Credit Card

The AMPilatus Crypto Credit Card will be available in the first quarter of 2025, enabling users to use their cryptocurrencies for everyday purchases. This integration bridges the gap between digital and traditional fiat currencies, facilitating a seamless transaction experience.

4. Technology

4.1 Blockchain Integration

The AMPilatus platform utilizes blockchain technology to ensure secure and transparent transactions. Our smart contracts are designed to enable efficient and tamper-proof processes.

4.2 Security

We implement state-of-the-art security measures to protect the assets and data of our users, including multi-level authentication and encryption.

5. The AMPilatus Ecosystem

5.1 Platform Overview

The AMPilatus platform is designed as a holistic ecosystem that not only provides financial services but also integrates a community-driven approach through its governance model. Users can benefit from a variety of financial activities all integrated into one seamless application, which includes:

- **Global Real-Time Payments:** Similar to systems like TWINT, but with global reach, facilitating instant financial transactions across borders without the usual fees or delays associated with traditional banking systems.
- **Crypto Investments:** Users can invest in various cryptocurrencies, benefiting from potential growth in the crypto market.

- **Borrowing and Lending:** The platform will offer decentralized finance (DeFi) services, allowing users to borrow against or lend their crypto assets in a secure environment.
- **Merchant System with Discounts:** Collaborations with major retailers to offer exclusive discounts and a cashback program to AMPilatus users.
- **POS System:** Any retailer with a smartphone can transform their device into a fully functional POS system, capable of accepting payments through the AMPilatus app.
- **Escrow Service:** Ensuring the security of high-value transactions through a trusted third-party mechanism.

5.2 Swiss Crypto Credit Card

Launching alongside the app, the Swiss Crypto Credit Card will provide a tangible connection between digital assets and traditional purchasing methods. This card will allow users to spend their cryptocurrency holdings just as they would with a standard credit card, with the added benefit of earning rewards through the platform's cashback program.

5.3 Governance and Voting

Ownership of AMP Tokens confers voting rights within the ecosystem, enabling token holders to influence key decisions including:

- Integration of new systems and features within the platform.
- Distribution of dividends.
- Election of key executives and board members.

6. Financial Plan and Tokenomics

6.1 Token Distribution

- **Total Number of Tokens:** 100 million AMPTokens.
- **ICO Sales:** 50 million Tokens (50% of the total supply).
- **Seed Funding:** 10 million Tokens (10% of the total supply).

- Team and Advisors: 15 million Tokens (15% of the total supply), vested over two years to ensure long-term commitment.
- Ecosystem Development and Reserves: 15 million Tokens (15% of the total supply), reserved for future expansion and unforeseen ecosystem needs.
- Marketing and Partnerships: 10 million Tokens (10% of the total supply), used to promote the platform and build strategic partnerships.

6.2 Token Functions

- Medium of Exchange: AMP Tokens can be used within the platform for all transactions, services, and purchases.
- Voting Rights: Each token grants the holder the right to vote on key decisions within the AMPilatus ecosystem.
- Rewards and Incentives: Token holders benefit from various incentive systems, such as discounts and cashbacks, exclusively available within the platform.

6.3 Use of Funds

Raised funds will be allocated to:

- Technology Development: 40% (primarily for further development of the platform and new technological features).
- Marketing and User Acquisition: 30% (for launching the platform and increasing the user base through targeted marketing campaigns).
- Operational Costs: 20% (for ongoing operations and scaling of the platform).
- Legal and Compliance: 10% (to ensure compliance with all legal requirements).

7. Roadmap

- 2024 Q4: Seed funding round.
- 2025 Q1: Launch of AMPilatus app and Swiss Crypto Credit Card.
- 2025 Q2 and beyond: Continued expansion and integration of new services.

8. Conclusion

AMPilatus GmbH is committed to redefining financial technology with a focus on user empowerment and innovation. Through its comprehensive suite of services and community-driven governance, AMPilatus is poised to become a key player in the global financial ecosystem.
